SURFACE PREPARATION

All new surfaces must be dust free, clean, dry and free of salt bloom.

For old surfaces, as well as the above, remove loose flaky paint. When applied over old paint, unstable or cracked surfaces must be sanded, filled and levelled with the appropriate product from the Pinayplast range. If the surface is powdery or there are differences in absorption, first apply an acrylic fixer to create a homogenous surface, particular with strong colours.

STORAGE

Easy to mix by shaking after 12 months' storage in a sealed container. Does not form skin or lumps. Keep away from temperatures below 5 °C.

SAFETY

Consult the label and the Safety Data Sheet.
